for the home

Catalogus 2012

Intro

Podium for the home — geef uitdrukking aan uw stijl met licht

De juiste verlichtingsarmaturen kunnen wonderen doen voor uw woonomgeving. Ze helpen u niet alleen uw taken gemakkelijker uit te voeren, maar versterken ook de inrichting van uw woning.

De veelzijdige, stijlvolle en hedendaagse Podium for the home verlichtingsarmaturen zijn geschikt voor een veelheid van toepassingen in en om het huis. Deze 373 functionele en decoratieve producten scheppen een gastvrije, natuurlijke sfeer die de kwaliteit van leven verbetert in uw woonruimte, badkamer of thuishkantoor en die uw tuin tot leven brengt. De uitgebreide reeks weerspiegelt de nieuwste trends in verlichting en omvat zowel hedendaagse als meer traditionele ontwerpen voor binnen- en buitentoepassingen.

Om u meer vrijheid in verlichtingsontwerp te bieden, worden onze armaturen geleverd zonder lamp. Ze zijn ontworpen om plaats te bieden aan een grote keuze aan lichtbronnen; van halogeen- en compacte fluorescentielampen tot energiezuinige LED-oplossingen.

Ons productenassortiment is ontwikkeld onder strikte procedures voor kwaliteitsbeheersing en met eersteklas grondstoffen zoals aluminium, roestvrij staal, glas en duurzame kunststoffen. Al onze producten zijn CE-goedgekeurd.

Creëer een heldere toekomst

Het is geen verrassing dat LED-verlichting zo populair blijkt te zijn. Vergeleken met conventionele lichtbronnen zijn LED's erg energiezuinig en duurzaam. Ze zijn zeer geschikt voor diverse toepassingen in en om het huis; van architecturale verlichting tot accentverlichting van het interieur en zelfs sfeerverlichting op moeilijk te bereiken plaatsen, waar hun lange levensduur werkelijk een voordeel biedt.

LED-verlichting biedt de volgende voordelen:

- Lange levensduur
Uiterst lange levensduur: 20.000 uren.
- Schokbestendig
Doordat LED's geen kwetsbare spiraal hebben, noch glas bevatten, zijn ze erg sterk en duurzamer dan welke andere lichtbron dan ook.
- Hoog energierendement
LED's hebben slechts een fractie van de energie nodig die wordt verbruikt door conventionele lampen. Ze zijn economischer in het gebruik want er is minder energie nodig om een helder licht te produceren.
- Veilige werking op laagspanning
LED's werken op een extra lage veiligheidsspanning; dat verbetert de veiligheid.
- Lage warmte-uitstraling
LED's produceren erg weinig warmte en dat maakt hen uiterst veilig in het gebruik.

Podium for the home biedt een diversiteit van 134 LED-oplossingen voor binnen- en buitentoepassingen.

Inhoud

2 ▶ 60

Woonkamer - Breng uw woning tot leven

Hoe u zich thuis voelt, wordt in hoge mate bepaald door uw verlichting. Elke verlichtingstechniek schept een andere sfeer: zacht en sensueel, energiek of rustgevend. Er zijn verschillende soorten licht nodig voor verschillende doeleinden, bijv. het lezen van de krant, het scheppen van een ontspannen sfeer of het leveren van oriëntatielicht 's nachts.

Podium for the home biedt een brede reeks verlichtingsarmaturen voor taak-, algemene en accentverlichting, passend bij elk woningverlichtingsplan, ongeacht of dat de woonkamer, keuken, slaapkamer of gang betreft. Functioneel of decoratief, onderscheidend of onopvallend, Podium for the home verlichtingsarmaturen harmoniëren altijd natuurlijk met hun omgeving.

61 ▶ 70

Badkamer - Verzacht de sfeer in uw badkamer

Nu de badkamer steeds meer een plaats wordt om te ontspannen en op te laden, is het essentieel om er de juiste verlichting te kiezen. Het belangrijkste gebied in uw badkamer in termen van verlichting is de ruimte rondom de spiegel, want daar vindt de meeste lichaamsverzorging plaats. Het licht moet hier zacht en diffuus zijn, zonder schaduwen of verblinding; andere lichtbronnen kunnen gebruikt worden om de algemene sfeer in de rest van de ruimte te verbeteren.

De Podium for the home badkamerreeks omvat stijlvolle LED-oplossingen met een laag energieverbruik voor het versterken van het interieurontwerp of het leveren van oriëntatie 's nachts. De meeste van onze verlichtingsarmaturen zijn dimbaar, dus het licht in uw badkamer kan 's ochtends helder en inspirerend zijn en 's avonds zacht en gedempt.

We hebben ervoor gekozen ons te houden aan de strengste normen, en dat verzekert de veiligst mogelijke installatie. Raadpleeg bij twijfel een gekwalificeerde elektrische installateur of neem contact op met uw verkoper.

71 ▶ 74

Thuiskantoor - Geniet van het thuiswerken

Dankzij de technologische vooruitgang kiezen steeds meer mensen ervoor om van huis uit te werken. Daardoor is het nooit eerder zo belangrijk geweest u ervan te verzekeren dat u een goed verlichte werkruimte hebt in uw thuiskantoor.

De juiste verlichting kan helpen problemen zoals oogvermoeidheid en hoofdpijn te voorkomen. Taakverlichting is vereist voor activiteiten zoals lezen, schrijven en computerwerkzaamheden, terwijl algemene verlichting wordt gebruikt om het kantoor in zijn geheel te verlichten. U kunt ook besluiten dat u accentverlichting wilt om bepaalde objecten te benadrukken.

75 ▶ 105

Buiten - Schep een magische buitenomgeving

Tuinverlichting is een van de eenvoudigste en meest effectieve manieren om het aanzien en de functionaliteit van uw leefruimte buiten te versterken. Zij stelt u in staat meer tijd door te brengen in deze natuurlijke uitbreiding van uw woning.

Goed geplaatste verlichting kan een wonderlijke sfeer scheppen door het benadrukken van de architectuur, het aanlichten van bomen en het accentueren van bloembedden. Door functionele en creatieve verlichting te combineren, verbetert u niet alleen uw woonomgeving maar verzekert u ook de veiligheid van uw gasten en schrikt u inbrekers af.

De nieuwste Podium for the home verlichtingsarmaturen voegen een vleugje drama en raffinement toe aan elke leefruimte buiten. Deze energiezuinige verlichtingsoplossingen bevatten de allernieuwste LED-technologie en infraroodsensors.

Symbolenkaart

Verklaring van IP-nummers (beschermingsklasse)

IP 00

	<i>eerste cijfer</i> bescherming tegen solide voorwerpen	symbool	<i>tweede cijfer</i> bescherming tegen binnendringen van water	symbool
0	niet beschermd		niet beschermd	
1	voorwerpen > 50mm		druppelend water	⬇
2	voorwerpen > 12mm		druppelend water indien tot 15° gekanteld	
3	voorwerpen > 2,5mm		sproeiend water	☐
4	voorwerpen > 1,0mm		opspattend water	⚠
5	stofvrij	⚡	waterstralen	⚠ ⚠
6	stofdicht	⚡	stortbuien	⚠ ⚠
7			tijdelijke onderdompeling	⚠⚠

Voorbeeld : IP44 ⚠ betekent beschermd tegen voorwerpen >1mm en opspattend water (spatwaterdichtheid)

Verklaring van passief infrarood - buitenverlichting

P.I.R. 140°

De detectieveldhoek van de bewegingssensor bedraagt 140°. Indien gemonteerd op een hoogte van 2,5 m reageert de infraroodsensor op elke beweging binnen een afstand van 6 m.

☼ Instelling van de lichtgevoeligheid traploos van 5 tot 5.000 lux (volledige duisternis, schemering of daglicht).

🕒 Tijdinstelling traploos instelbaar van 5 s tot 5 min.

Dimmen van LED

Het grootste deel van de reeks **LED**-producten is dimbaar. Dit is aangeduid met het 🕒-symbool. De dimmer dient een faseafsnijdende dimmer te zijn

Symbolenkaart

Verklaring van de symbolen

	met aan/uit-schakelaar op het artikel
	kabel, schakelaar en stekker inbegrepen
	verstelbare hoogte
	artikel is dimbaar
	incl. inclusief dimmer
	elektronisch voorschakelapparaat / elektronische transformator
	elektromagnetisch voorschakelapparaat
	flexibele arm
	beweegbare onderdelen
	product kan zowel horizontaal als verticaal worden geplaatst
	product kan zowel aan het plafond als tegen de wand worden geplaatst
	producten kunnen graden gedraaid en gekanteld worden
	producten kunnen graden geïnclineerd worden
	magnetische sluiting voor eenvoudige lampvervangning
	met pulsschakelaar: deze ingebouwde schakelaar detecteert de pulsen van de aan/uit-schakelaar in de behuizing. Als de aan/uit-schakelaar binnen een korte tijdsperiode (<10 s) meerdere keren wordt gebruikt, wisselt de armatuur automatisch van lichtbron (LED en GU10/2GX13).
	hoogte
	lengte
	breedte
	afmetingen inbouwopening
	minimale inbouw diepte
	klasse I
	klasse II
	klasse III

Verklaring van gebruikte materialen

	ABS: acrylnitril butadien styreen
	staal
	PP: polypropylene
	aluminium
	PC: polycarbonaat
	glas
	roestvrij staal
	PMMA: polymethyl methacrylaat
	zamak: legering van zink en aluminium

Verklaring van gebruikte kleuren

	11: chroom
	17: mat chroom
	30: zwart
	31: wit
	48: geborsteld aluminium
	60: helder glas
	67: opaal glas
	87: grijs
	93: antraciet
